Rameesh,

Below steps to follow.

1. Please contact Rajat/Suman for access to the code on Github along with your github user-id. They kindly also agreed to help out with any setup or code related issues. Take their help to get started soon.
2. The server is on the machine 10.129.1.153. The server code is also in this: /home/bhaskar /speechtotext. To login: bhaskar@10.129.1.153 ; passwd is birds@iitb
3. The students used Kaldi and other useful scripts. These are on synerg-root@10.129.2.55: home/synerg-root/speechtotext (a powerful server which can process things fast). I will give access to this machine when you require it. Meet me.
4. We also have a gmail account associated with this project.

   Clap Gmail
       clap.iitb@gmail.com
       Password: speechtotext

5. On the server, the Django details are as under

Django Admin
speechtotext.cse.iitb.ac.in/admin
Dashboard
speechtotext.cse.iitb.ac.in/dashboard

Username: speechtotextadmin
Password: speechtotext
